EXPERIENCE

Software Engineer Intern | LOQOL / Sunday.Pro Inc.

Aug 2026 - Present

- Built seller and agent workflows across React/TypeScript, FastAPI and PostgreSQL for a real-estate transaction platform, translating stakeholder requests into dashboards, disclosures and document flows.
- Developing Charlie AI with OpenAI: implemented deal-aware disclosure guidance, source-linked document context and agent-confirmed actions; expanding separate seller assistance and saved conversation workflows.
- Reworked draft synchronization to preserve seller edits during background updates; improved uncertain-answer handling and completion rules in an 82-question disclosure interview.
- Mapped seller answers across a 133-field Transfer Disclosure Statement catalog; implemented MLS routing and invalidated stale routing after property-address changes.
- Integrated DocuSeal seller, co-seller, salesperson and broker signing stages; implemented offer-PDF extraction with agent review and document send prerequisites.
- Optimized PDF reads with verified preview caches, signed storage URLs and freshness checks; implemented Alembic migrations and supported Cloud Run deployments, regression tests and release verification.

Software Engineer & SEO Specialist Internship | GOSVEA Inc.

2026

- Built ALLCPR's iOS training app and delivered TestFlight builds with course discovery and native form flows.
- Built course discovery and enrollment flows for FirstCPR.com and location-intelligence tooling integrating external data sources.

SELECTED ENGINEERING

Founder | Curio

Jun 2026 - Present

- Built and released an AI reading app on the iOS App Store and Google Play using React, TypeScript and Capacitor.
- Implemented AI card generation, factual-risk checks, translation and in-app explain/quiz workflows.
- Built Express/PostgreSQL backend services and shipped product iterations for offline reading, saved content and interactive scenarios.

EDUCATION

B.S. Computer Engineering | California State University, East Bay

Expected 2027

A.S. Computer Engineering | Green River College, 2022 - 2024

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, SQL

Frontend: React, TanStack Query, Vite, Capacitor

Backend and data: FastAPI, Express, REST APIs, PostgreSQL, SQLAlchemy, Alembic

Cloud and tools: Google Cloud Run, Supabase, Git, GitHub Actions, DocuSeal, OpenAI API
